I think I have told most of you that I am going to be away from EPA this summer June 21 – Sept 15. During that time, Jennifer Cheever is stepping in to be your EPA RPM contact for the General Mills Site. I have briefed her on the site and told her that the only need I anticipate over the summer is to review the State's draft Five-Year Review that will be sent by Dave. She's a great RPM, you will be in good hands should anything else arise.

Jennifer can be reached at:
